

# Shank-Free and Metal-Free Orange Backbone (#6025)

The Safety Orange backbone is made from a rubbery plastic that eliminates the ability to be sharpened into a shank. This is a standard 5” backbone and the special orange polymer is flame resistant. The ribbing on the backbone acts as a beater when shaking the mop.

The Safety Orange Backbone can be used with either the New Flexible Plastic handle and Connector (#6031E-PL56) or the “Panther Pole” black fiberglass handle (#6031E-F56) which are both sold separately.
